world  
first

## **LAPIS LAZULI LEADS THE WAY TO A NEW ERA OF CONTACT LENS CARE**

***Lenscare goes Natural!***

**Lapis Lazuli's "Aqua Balance<sup>®</sup>" multipurpose solution  
for all soft contact lenses  
introducing Hyaluronate and Allantoin  
to contact lens care**

- ✓ Aqua Balance<sup>®</sup> takes lens wearing comfort to a new dimension
- ✓ Aqua Balance<sup>®</sup> is the first visco-elastic, disinfecting, cleaning and rewetting contact lens solution with recombinant DNA technology-derived Hyaluronate as a component of the Aqua Balance<sup>®</sup> complex
- ✓ Aqua Balance<sup>®</sup> Complex, with biological substances such as Hyaluronate and Allantoin, provides moisture balance and a cushion of comfort, also for silicone hydrogel lenses
- ✓ Hyaluronate in Aqua Balance<sup>®</sup> (meeting Eur. Pharm. criteria) is completely safe and has well defined molecular characteristics and excellent stability, visco-elasticity, moisturising and rewetting properties
- ✓ The biological compound Allantoin in the Aqua Balance<sup>®</sup> Complex is well known for its cell protecting properties and its supportive action against toxic substances. Its use in ophthalmic preparations is internationally patented
- ✓ Clinical studies have confirmed the eye health enhancing effects of Aqua Balance<sup>®</sup>, both in first-time lens wearers, existing wearers and lens wearers with problematic tear films

**LAPIS LAZULI**  
**EYE CARE**

## **Performance characteristics of "Aqua Balance®" at one glance:**

- ✓ **Proven powerful and safe disinfection of lenses and lens case**
- ✓ **Proven efficient daily cleaning ("no rub" for lenses worn up to 30 days)**
- ✓ **Proven excellent rewetting and moisturising properties, giving a unique visco-elastic cushion of comfort and less fatigue**
- ✓ **Hypo-allergenic and suitable for all types of soft contact lenses**
- ✓ **Moisture balance provides comfortable extended wear, also for silicone hydrogel lenses**
- ✓ **Clinical ophthalmologic studies show excellent results, also in patients with problematic tear films**
